## Welcome to Medex UK

Supplying Pharmaceutical, Medical, and Healthcare chemical products is our business.

Are You...

- Looking for a pro-active supplier who will help you find cost effective Pharmaceutical products?
- Searching for products or pack sizes which have been difficult to find?
- In need of a supplier who can put together a mixed load of products in one delivery?
- Seeking a partner who can help you solve your Pharmaceutical supply problems?

Whatever your needs, we can help.

Medex UK is a Pharmaceutical Supply business offering comprehensive supply-chain services to businesses and organisations across the world from its main office in the UK, and sales offices in Turkey and India.

To access product information visit our website and click on the product or market information links.

**What do we do:** pharmaceutical supply, serving businesses in Medical, Healthcare, Hospital, United Nations, and Government markets. APIs and chemicals are supplied from its central Northamptonshire location in England, with easy access to motorways, airports and sea ports.

**Exports:** business serves over 70 countries from our Naseby, UK headquarters.

**Customer Service:** We have a positive service attitude to solving difficult supply problems, offering products ranging from controlled, licensed Pharmaceutical products to generic, finished dosage forms i.e. tablets, capsules, ampoules, solutions, creams and ointments, through to fine chemicals and inorganic products. We can supply in small volume quantities, customised packing and many pack sizes not easily obtained elsewhere. Pharmacy dispensing is regularly supplied by our Galenicals service.

**Supply chain:** service levels are professional, flexible and organised to match the client's specific requirements. We arrange import and export certifications, proof of origin, and quality documentation delivering, service, trust and reliability. We supply markets which need GMP quality products from certified and approved manufacture

**Environment:** A policy of waste reduction and care for the environment is reinforced through working with approved suppliers who demonstrate appropriate waste minimisation standards and process control.

**Experience:** 25 years proven experience in this international healthcare environment supplying pharmaceutical businesses, Government public health offices, United Nations and NGO agencies. Customers range from manufacturers to Hospitals, Laboratories to Public Health Departments, Africa to North America, Asia to Europe, and Middle East to South America.

**Services:** we offer supply expertise, practical help to resolve problems, working with clients to meet regulatory requirements, delivery flexibility and importing/exporting advice, product insurances, financial terms to fit client circumstances, Letters of Credit, and financial documentation.

## Purchasing

MEDEX UK Purchases a wide range of materials from packaging to chemicals.

We require a high level, service driven, approach from our approved suppliers and a positive attitude to the delivery of products on time every time, without quality problems.

Our successful partners are suppliers which regularly meet their lead-times, deliver products which are supplied 'right first time'. Matching the ever increasing service standards requires our supplier's supply chain department to deliver 1<sup>st</sup> class paperwork, documentation, COAs, MSDS, hazard labels, UN packaging, export licences etc.

## Successful suppliers :

Understand their responsibility to deliver the product ordered, fully meet the purchase terms and conditions on the purchase order. Payment is guaranteed if the supplier meets its responsibilities on quality, delivery timelines and paperwork.

Our business reputation is important and we are proud of it.

**Expectations:** Suppliers will meet International standards on environmental care, control of waste, process control, safe working, ethical and respectful employment policies. Competitive pricing is fundamental.

Meet the needs of our supplier approval system, provide a stable, consistent supplier partnership, and benefit from qualifying as a favoured partner. Our customers build on our service and quality values in their business.

### Sales:

The usage of fine chemicals and inorganic chemicals can be found in markets as wide as agrochemical to performance chemicals. Many of our products can be supplied to a technical or industrial specification in various pack sizes and delivery lots. Bulk and semi-bulk deliveries are as possible as 200lt drums or 25kg packs. The world of chemistry does not confine itself to one market and Medex UK covers chemistry.

We supply businesses and international organisations active in, or responsible for, the delivery of Pharmacopeia regulated chemicals, generic products, APIs and finished dosage products to Healthcare, Medical, Hospital, Governmental, UN and Ministry of health, service companies. Bulk tablets, blister packs, capsules, ointments, creams, bottles, tubs, vials, are examples of some of the presentations we offer. Special packaging is a regular service we provide to our customers, including pumps and product dispensing assemblies.

We supply products, market knowledge, expertise and, via industry partners, a strong relationship with synthetic chemical manufacturers and contract manufacturing. Our associated offices in markets offering technical innovation in lower cost countries, we also offer a service to assist clients find suitable producers for new intermediate chemicals under unique and individual supply contracts. Our history and professionalism means that confidentiality, and care of intellectual property, are key parameters core to our activities.
